

## MODEL ANSWER- WRITING TEST 3

### Task 1:

*Dear Clare,*

*I'm very happy to get your email yesterday and know that you are getting used to your new life. Why don't you tell me why have you been so busy and what is going on there?*

*How many bedrooms are there in your new house? Is there a garden in front? What do you like most about the house? Remember to send me some photos of it. I love to see them.*

*You know, missing some things and people here after you have moved to a new place is a matter-of-course. However, I wonder who and what you miss. Do you miss me and the time we got together?*

*I can't wait to visit you there. What about next September? I have a week off then, so I can arrange to go and stay with you for a few days.*

*Hope to hear from you soon.*

*All the best,*

Word count: 150

### Task 2:

In most parts of the world, including Vietnam, the popularity of fast food is growing at a considerable rate. Some people hold the view that fast food poses several health hazards to consumers. However, **personally, I strongly believe that eating fast food is a great idea for busy people for two following reasons.**

*To begin with, most people, especially young adults consider fast food as a convenient source of food. In fact, fast food can be prepared and served within a very short time. One day, if you get stuck in a traffic jam on the way home from work and don't have enough time to cook dinner, just take the whole family straight to a KFC restaurant to eat some fried chicken with french fries. Obviously, fast food industry helps to save human time*

*Another reason is that eaters can enjoy the pleasant atmosphere in an*

air-conditioned fast food restaurant which is beautifully decorated with colorful lights, nice paintings, and modern multi-shaped tables and chairs. It can't be denied that you will definitely feel relaxed and comfortable after hard work and enjoy the good taste of hamburgers, hot dogs, pizzas, and so on here.

*Turning to the other side of the argument,* consuming too much fast food is the cause of obesity, diabetes, high blood pressure, and heart disease. In fact, this kind of food is rich in fat, salt, artificial substances and oils, all of which increase the risk of those health problems. Some recent surveys show that the number of obese children is alarmingly on the increase.

*All in all,* I'm in favor of the idea that going to a fast food restaurant for meals is the best choice when you are as busy as a bee. However, you should limit the amount of oily and salty fast food consumed due to lots of warnings of health threat suggested by doctors and nutritionists.
